SUMMARY

Full Stack Developer (MERN) with hands-on experience building RESTful APIs, authentication workflows, and scalable web applications using Node.js, Express, MongoDB, and React. Completed a fintech startup internship and developed production-grade projects involving backend development, secure authentication, and modern frontend practices.

SKILLS

Languages: C++, Python, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Responsive Design, GSAP

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL

Concepts: MERN Stack, MVC Architecture, Authentication & Authorization (JWT), CRUD Operations

Tools: Git, GitHub, Postman, VS Code

EXPERIENCES

Kistify, Bangalore

May 2025 - Jul 2025

Software Developer, Intern

- Contributed to backend development of a Loan Against Mutual Funds (LAMF) platform at a VC-backed fintech startup within the Razorpay Rize ecosystem.
- Developed and integrated RESTful APIs using Node.js and Express for core loan workflows, including eligibility checks and data validation.
- Assisted in implementing partner API integrations (Bajaj Finserv / Bajaj Financial Services) to support loan processing and disbursement pipelines.
- Worked on CRUD operations, request validation, and error handling to improve reliability of backend services.
- Collaborated with senior developers to debug issues, test APIs using Postman, and follow secure coding and version control practices.

EDUCATION

CV Raman Global University

July 2023 - Present

B.TECH in Computer Science and Engineering

CGPA: 7.81

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, OS, Computer Networks, Machine Learning, Data Mining, Advanced Data Structures and Algorithms

PROJECT WORK

- Immersive 3D Web Experience with GSAP** : Designed and developed an immersive, modern web experience featuring smooth momentum-based scrolling and parallax effects using Locomotive Scroll, along with advanced GSAP animations such as complex timelines, text reveals, and a custom preloader. Built a premium, dark-themed, fully responsive UI with infinite text marquee, leveraging HTML5, CSS3, and modern JavaScript (ES6+) for seamless performance and engaging user interactions.
- SocialEcho - MERN Stack Social Network**: Developed a full-stack social media platform featuring automated content moderation using Python (BERT/Transformers) and context-based authentication (IP, Location, Device) for enhanced security effectively reducing spam and increasing account safety.
Key Technologies: React.js, Node.js, Express, MongoDB, Redux.

AWARDS AND CERTIFICATES

- Winner - Internal Hackathon** : Built an indigenous track monitoring system for real-time condition tracking and fault detection, focusing on safety, reliability, and cost-effective implementation.
- UI/UX specialization on Coursera
